

# Carbon Reports Special Issue: CMB-Next 2024

- Joint Project of the Next Generation Group and the Editorial Board  
of TANSO in the Carbon Society of Japan -

**Publication: December 2025**

**Deadline of submission: 31 July, 2025**

**Editors: Takafumi Ishii, Koji Nakabayashi, George Hasegawa and Toshihira Irisawa**

The International Symposium on Carbon Materials Breakthrough in the Next Generations, *CMB-Next 2024*, organized by the Next Generation Group of the Carbon Society of Japan, was held in Miyazaki, Japan, in September 2024. This symposium aims to promote technical exchanges among young researchers worldwide working on carbon materials and foster ongoing interactions to develop collaborative research relationships. In commemoration of this symposium, we plan to publish a special issue of *Carbon Reports*, an international journal published by the Carbon Society of Japan. This issue will include the research conducted by presenters and participants at *CMB-Next 2024*; any research related to carbon materials or their development presented at *CMB-Next 2024* is welcome for inclusion in this special issue, regardless of the research field. In particular, students are strongly encouraged to submit communications based on their poster presentations.

**How to submit:** Please prepare a manuscript following the “Author instruction” URL: [AuthorGuidelines\\_2023.pdf \(jst.go.jp\)](https://www.jst.go.jp/AuthorGuidelines_2023.pdf), and submit the manuscript file to [tanso-edit@bunken.co.jp](mailto:tanso-edit@bunken.co.jp). Please clearly describe in your email that you are submitting the manuscript to **the special issue CMB-Next 2024**.

**Type of manuscript:** Any formats are acceptable: Research Paper, Communications, Integrated Paper, Account, Review, Technical Report, and Reference Data.

**Deadline:** 31 July 2025

**Peer-review:** The manuscript will be subjected to our advanced review process in which reviewers provide constructive comments to improve your manuscript, rather than rejecting your manuscript.

**Publication:** Carbon Reports Vol. 4, No. 4, December 2025
